Summary

Dedicated Software Engineer, proficient in both front-end and back-end development, specializing in Java, Spring Boot, Angular and TypeScript.

Skills

Java, Spring, Spring MVC, spring boot, REST, Spring Microservices, SQL, JDBC, APIS, Servlets, JSP, Type Script, Angular, Html5, CSS, Software development, Agile, JIRA, Communication skills

Experience

SPEC India | Ahmedabad, Gujarat Software Engineer | 01/2023 - Present

- Gained expertise in front-end (Angular, TypeScript) and back-end (Java with Spring Boot) development.
- Successfully addressed challenges in Angular development, focusing on custom modals and complex user interfaces, showcasing strong problem-solving skills.
- Transitioned into backend development responsibilities, contributing to the project through API development using the Spring Boot framework.
- Actively participated in team communication, daily stand-up meetings, and collaborated effectively to align with project goals and timelines.
- Demonstrated problem-solving skills in both front-end and back-end development, finding efficient solutions to complex issues.
- Took ownership of project components, ensuring timely delivery of high-quality software solutions.
- Pursued ongoing learning and skill development to stay updated with the latest trends and best practices in full-stack development, enhancing overall project performance.

PMC Retail | Vadodara, Gujarat Project Trainee | 07/2022 - 10/2022

Developed a strong foundation in advanced Java concepts, including Servlets, JDBC, Spring, Hibernate, and Spring MVC.

- Applied advanced Java concepts in real-world scenarios, enhancing understanding and proficiency in these technologies.
- Gained practical experience in database integration using JDBC, ensuring efficient data retrieval and manipulation for web applications.
- Acquired hands-on experience in building web applications using the Spring MVC framework, facilitating the creation of dynamic and user-friendly interfaces.

Projects

• TECH BLOG

Created a dynamic Technology Blog Platform, combining frontend expertise in HTML and CSS with a robust backend powered by Servlets, JSP, and JDBC. This project showcased programming skills and the ability to deliver user-friendly web applications with features like user authentication, blog posting, and profile editing, reflecting a commitment to innovation and problem-solving.

Education

Babaria Institute of Technology | Vadodara, Gujarat Bachelor of Computer Science | 07/2023

Languages

English, Hindi, Gujarati
